Generate Brewing Schedule

The stats window will give the user feedback on their recipe. Values that are out of range for the beer style will be highlighted in red. Values in green show the user that they are consistent with this style of beer.

Users can search for or load existing recipes

Feedback button allows user to easily post their recipe on our forum to have others look it over

Users add their ingredients to the three categories. Ingredient parameters (ex: alpha % for hops) are automatically loaded when a user types the name.
